Up to 9 bottles

Horizontal display
Up to 7 bottles

*Capacity stated for "traditional Bordeaux" bottles
**130 bottles in champagne + "traditional Bordeaux"

Every detail,
carefully crafted.

Quality

Every detail is a testament to EuroCave Professional's excellence.

Durable, high-quality materials

Structure of cabinet body in reinforced metal, shelf in beech wood, very hard-wearing, internal walls in aluminium.

A controlled environment

Electronic control to maintain the required temperature to the nearest 10th of a degree, compressor placed on "silent blocks" to prevent vibration, polyurethane foam insulant injected into the cabinet body structure in order to ensure a constant temperature.

Peace of
mind

Access to the contents of your wine cabinet is secured via a lock.
Several visual alarm systems also protect your wine every day: humidity,
temperature fault, charcoal filter and temperature sensor fault.

# A relationship of trust
& support

Made in France.

Local support with a network of experts in France and abroad.

All EuroCave Professional products have an individual identification
number which allows their origin and authenticity to be established.
